(54) Title: ARRANGEMENT IN FUEL INJECTION APPARATUS

(57) Abstract: An arrangement in the fuel injection system for controlling the fuel injection, the arrangement (4) comprising a body part (5) with a space (6) arranged therein, through which space the fuel to be injected flows during operation, the space further having an inlet opening (7) and an outlet opening (8) opening therein. The arrangement (4) further comprises a piston means (9), arranged movably in the space and a flow path for creating a flow connection between the fuel inlet (7) and the fuel outlet (8) openings. The flow path comprises at least one throttling portion (35, 40, 91, 92) opening into the space of the body part, the cross-sectional flow area of the throttling portion being defined by the relative positions of the piston means (9) and the body part (5).
